

BRAKE PAD OVERVIEW

The first step of brake tuning is simple. Our organic brake pads deliver impressive braking power, precise modulation and high fading stability, as each brake is only as good as its pads.

POWER

IF YOU'RE LACKING BITE.

Gives you the necessary bite when you need it most. The POWER pad with its impressive braking power and fading stability offers you the precision to stay in control even in the most critical moments. Savor the thrill to the fullest.

POWER+

STYLISH SUPERPOWER.

Puts the icing on the cake of the POWER pad. The nickel-coated backing plate not only promises enhanced corrosion resistance but also gives your brake a very special gleam. For all those who prefer chrome to chromatic.

STANDARD

A TIRELESS COMPANION.

Anything but standard. A performance pad with continuously high braking power, consistent modulation and excellent in durability. For those who prefer to spend their time riding rather than waiting.

POWER ALU

LIGHTWEIGHT CONSTRUCTION DOWN TO THE SMALLEST DETAIL.

For the weight weenies who can't quit. POWER ALU combines the POWER compound with an aluminum backing plate and thus maximizes the weight advantage. But beware - not recommended for long descents or high system weights.
